

SimpleMED is more than billing software it's a Practice Management tool that will help manage the business side of your practice. Basic features include insurance billing, patient billing, after care, registration, scheduling, referral tracking,...

reporting, recall, accounts receivable management, pop up alerts and electronic claims processing. uses color coded patient accounts to visually identify past due balances. Quick view shows last visit, next visit (if any) Primary Care Dr, Pharmacy, Insurance Coverage, HIPAA Letter (Y/N), Referral Number and remaining visits, Co-pay Amount etc. SimpleMed is easy to use and has an intuitive flow that makes the transition from another system easier on the office staff. The many useful reports such as unpaid claims, AR by Insurance, Expiring Referrals, Provider Production, Referring Dr Production, Payments by Payer and many more can be printed or previewed to screen. Unique intelligent payment posting module remembers what Insurance companies have paid and allowed in the past. Just click the line items to pay and it does the rest. This standard feature is a huge time saver.
